

PRODUCT OVERVIEW

ETI Lighting's Altair Canless Downlights and Gimbal Canless Downlights deliver quality, flexibility, and easy installation for **residential and commercial** applications. Available in single- and multi-volt configurations, with high-output 6-inch options and adjustable gimbal models.

Designed for new construction, remodel, and retrofit projects, these low-profile luminaires install directly into drywall or drop ceilings—eliminating the need for a recessed housing or secondary junction box.

Featuring **5 Color Preference®**, 90+ CRI, a modern appearance, and wet-location rating, Altair downlights are ideal for multifamily, residential, hospitality, office, and other commercial applications.
