

## PRODUCT OVERVIEW

ETI Lighting's Altair Surface Mount Downlights with **5 Color Preference®** and Surface Mount Downlight with PIR Motion Sensor and **3 Color Preference®** are sleek, flexible and can brighten up various residential spaces. Luminaires have field-selectable CCT options and a soft, comfortable light quality. They are 90+CRI and JA8/Title 24 Compliant. Our PIR Motion Sensor option offers the additional convenience of **hands-free lighting**.

Lenses twist off these luminaires to easily select desired CCT. With a low-profile design, they work with pancake junction boxes.

With a projected life of over 130,000 hours, these lights are ideal for new or retrofit construction projects in multifamily, homes, hospitality, offices, and other areas.

INNOVATE. ILLUMINATE. INSPIRE.
